

## FOCUS ON MOMBASA NATIONAL A.S.K. SHOW 1992

### Kantech Limited Offer Very Latest In Water Technology

TECH LIMITED WAS formed a year ago by Daniel Kaner, who has many years experience in water technology both in Israel and Kenya.

The office and showroom is in the Second Phase of Ratna Square above Barclays Bank, where you can view some of the range and discuss your particular needs with Daniel.

In the Coastal area Daniel is especially interested in demonstrating how irrigation can help to boost agricultural production and give increased crop yields.

To prove the effectiveness of the irrigation systems, Kantech have their own farm, where they are experimenting with high yield seeds.

Different systems are suitable for different crops, but particularly

useful in this climate is the drip irrigation method, where the water is fed direct to the roots of the plants, thereby minimising wastage and evaporation.

Fertilisers and insecticides can be dispensed directly into the irrigation system, ensuring even spread and accurate dosage.

The experienced agronomist at Kantech will assist in designing the system, which meets your requirements and advice on crops and treatment.

The equipment used is very versatile and easy to install, so it can be moved as required.

Kantech are Agents for top-quality Salmson Pumps from France, which comprises a wide range of pumps to suit all

requirements.

Salmson pumps are designed for reliability with corrosion-proof components, easy installation, simple operation and low maintenance - Ideal for local conditions.

The combined package can help solve your water problems and help achieve improved production quantity and quality on your farm, which will soon pay off the

investment in the irrigation system.

Also on the farming scene, Kantech offer the low-cost Mini-Dairy from Pladot for the production of the full range of pasteurised dairy products for the local market.

The Mini-Dairy has a modular design, which allows flexibility in building up your dairy business to suit your budget and growth plans.

The dairy equipment utilises advanced engineering, but is simple to operate.

It is reliable and dependable in daily use and built to last.

The Mini-Dairy can handle from 1000 to 10,000 litres of milk per day.

The product range includes

whole and skimmed milk, yoghurt, sweet and sour cream, soft cheeses, butter and a variety of white cheeses.

Kantech provides all the technical know-how and consulting services regarding your dairy building, the equipment, the electrical and mechanical installation, the set-up of your dairy operation, training of your staff and a back-up service.

So you are assured that Kantech will be there to support you fully in your venture, including equipment guarantees.

Kantech are also involved with the luxury aspects of water technology: Swimming Pools, Spa Baths, Garden Irrigation and Water Gardens.

Daniel Kaner is always ready to help with advice, so call in at the showroom and see what they can offer, or telephone them on (011) 472294, 472257.

### VEMA AGENCIES DEAL IN BUYING, SELLING AND RENTING SECTOR

VEMA AGENCIES, WHOSE Mombasa shop is on Nkrumah Road, just down from Trade Bank, are involved in a number of different areas.

The Head Office is in Nairobi and the Mombasa branch is run by John Njenga, the Property Manager and Cosmos Kilonzo, the Retail Manager.

Property is the main part of the Vema Agencies business portfolio. John Njenga handles Real Estate in all sectors of the market; Agricultural, Commercial, Residential and Industrial.

Vema Agencies will carry out everything from valuation to buying and selling and renting, including acting as Managing Agents.

The Showroom houses a display of a variety of Office Equipment and Household Goods.

Vema Agencies stock a wide range of brands including Olympia Typewriters, various photocopiers and fax machines, calculators and other accessories are also stocked.

They have recently recruited a Marketing Manager who is fully conversant with computers in order to develop that area of their business as well as the general sales.

For any office equipment they sell, Vema offer a full after-sales service and will carry out repairs on any equipment.

Office Furniture including desks, chairs and filing cabinets are on display in the large showroom. Vema Emporium

also provides photocopying services.

The range of Household Goods on display includes large appliances such as refrigerators and cookers, T.V.'s, videos, a selection of radio/cassettes and music systems, as well as car stereos (which they install), air-conditioners and fans, clocks and watches.

As with the office equipment, Vema Agencies offer after-sales service and repairs for all items.

In the workshop there are three technicians.

One handles the electro-mechanical equipment such as air-conditioners and fridges, one is the electronics expert and repairs TV's, videos, hi-fi's etc., the third is an expert on office equipment and repairs typewriters, photocopiers, fax machines, etc.

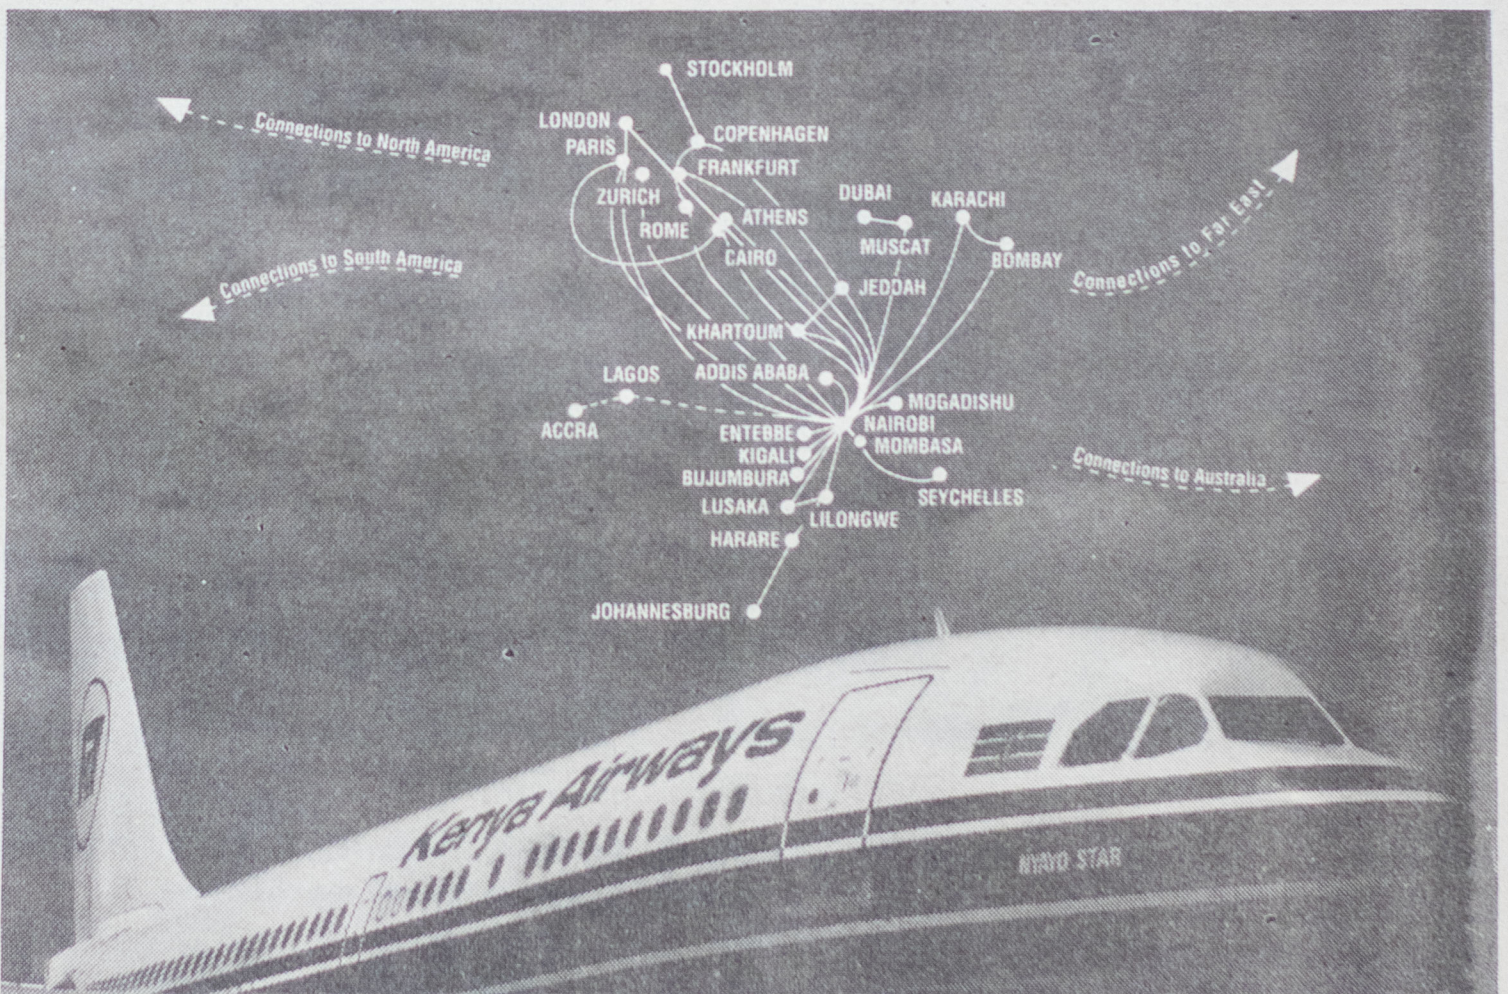

#### STEREOS

When you buy office equipment from Vema Emporium they suggest a maintenance contract and service guarantee for the first year, which includes four services.

The technician can also install the car stereos and even piped music systems in hotels.

So whether you wish to buy something new or just get something repaired, it is worth going along to Vema Emporium on Nkrumah Road to have a look and see if they can help you.
